

Fire Systems - FM-236 Fire Suppression System

Answering the Need

For many years, people recognized Halon 1301 as one of the most effective fire suppression agents for a diverse array of applications. It quickly extinguished all major classes of fires. It was especially effective in high-value asset protection situations where it caused no residual damage to delicate equipment. In addition, Halon 1301 systems were utilized for both occupied and unoccupied spaces and were easily installed by professionally trained fire protection systems dealers.

But Halon 1301 was thought to have significant environmental consequences due to its potential contribution to depleting the stratospheric ozone layer.

With the phase-out of Halon 1301 production, effective in nearly all countries at the end of 1993, the quest for a replacement resulted in the introduction of a number of clean fire suppression agents to the marketplace. FM-236 stands alone as the leading choice for high value asset fire protection with tens of thousands of successful installations worldwide.

The Margin of Safety

For the protection of people, sensitive and valuable facilities, other irreplaceable assets, and ultimately your business' survival, fire protection isn't a relative thing. It's an absolute. You want all the effectiveness you can get, as fast as you can get it. FM-236 provides you with a significant margin of safety that only time can buy.

Save Space

Where space is at a premium, FM-236 is the right choice. The extinguishing performance of FM-200 requires only a modest increase in agent storage cylinders compared to Halon 1301. FM-200 saves your expensive floor space for productive use. In many

Thank you for your interest . We are your Certified Fire & Safety Company. We are a one-stop-shop for your fire fighting, fire protection, fire prevention & security system needs.

We have three divisions - the Fire and Safety Division (FSD), the Fire Protection Division (FPD) and the Fire Rescue & Emergency Division (FRED).

The Firex Products Division (FPD) handles all of the portable fire fighting and fire prevention equipment such as the following:

- Piranha Fire Extinguishers (Piranha I, Dry Chemical, CO₂, AFFF, Pressurized Water)
- UL Listed Fire Extinguishers (Amerex - Dry Chem, CO₂)
- Fireman's Suit and Trousers , Fireman's Boots, Gloves, Helmet
- Escape Ladder & Fire Blanket ,Smoke Detectors
- Fire Hose Cabinets & Emergency Lights

The Fire & Security Systems Division (FSSD) takes care of all our fixed systems. We design, supply, install and maintain the following systems:

- Design, Supply, Installation and Maintenance of the following Fire Systems:
 - FM-236 Systems ,Sprinkler Systems
 - Fire Detection and Alarm Systems
 - CO₂, Water Mist, Argonite
 - Ceiling Type Fe 36 ,200
 - AFFF Foam Systems
- Security Systems, Door Access Systems & CCTV
- Maritime Fire Protection

The Fire Rescue & Emergency Division (FRED) manufactures the following::

- Fire Trucks & Ambulances
- Rescue & Emergency Vehicles for Building

You will get to know more about us in the next few pages. Please do not hesitate to get in touch with us and our distributors if you want to know more about our products and services.

It is our hope that we can work together in our mission:
To Save Lives, To Protect Properties
To Preserve the Environment
